

EDUSYNC

❖ To Run our website follow the steps mentioned below:-

- For FRONTEND : 1 – cd Frontend
2 – npm i
3- npm run dev (click on the link that appears)
- For BACKEND : 1 – cd Backend
2 – npm i
3 – node index.js (This will start the server)

Functionalities and what we offer:-

❖ Student Profile

- After you surf the website and when u come across the profile page you can see two option that will be Student and Admin
- To use the website From students handle The student/user has to Enroll themselves i.e fill the admission form and take admission in the institute .
- After filling your admission form You will receive your profiles password after completion of the payment , Users are required to remember the email address they enter and their respective password .

❖ Admin Profile

- Now , for the admin profile , The admins credentials will be provided from the Institute so it is stored in a static form and for now we only have 2 admins . And no one else can log into the admin profile . If anyone wants to use the admin profile contact the developers .

❖ Student Functionality :-

- When the Student logs in to his/her profile the profile will display their information, and their at the bottom student is given four options (concession form , fee receipt , admission form and log out)
 - Concession form – for travel concession and downloads a pdf.
 - Fee Receipt – downloads the fees Receipt pdf .
 - Admission form – downloads the admission form pdf.
 - Log out – Logs the student out from their profile .

❖ Admin Functionality :-

- Admin profile displays info about admin .
- Instead of Admission form button like in student and default website the admin's website will have Student log which displays all the details of students.
- And Beside the admission form link the admin can see Kt Students .
